

BX

Belt Driven Pressure Washers

- High pressure soap provides superior cleaning compared with soap injector systems.
- Belt driven triplex ceramic plunger pumps operate at slow speeds for reduced wear compared to direct drive pumps.
- Stainless steel water reservoir with brass level control.
- Pressure regulating unloader valve for easy pressure adjustment.
- Glycerine filled pressure gauge, prime valve, and safety pressure relief valve.
- Soap control allows exact selection of desired soap concentration.
- Durable powder painted steel components.
- Convenient carry handles.
- TEFC industrial 1750 RPM motor available in either single or three phase.
- Supplied with 35 feet of wire braid high pressure hose, quick couplers, trigger gun, high pressure swivel, insulated wand and stainless steel nozzle.

We reserve the right to make any changes in model shown which in our opinion will improve appearance, performance, or to comply with applicable standards.

Model No.	GPM	PSI	Motor
